FACT SHEET

KENTUCKY POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT TO DISCHARGE TREATED WASTEWATER INTO WATERS OF THE COMMONWEALTH

KPDES No.: KY0090093 Permit Writer: Ronnie Thompson Date: December 12, 2008

AI No.: 4116

1. SYNOPSIS OF APPLICATION

a. Name and Address of Applicants

Holley Performance Products PO Box 10360 Bowling Green, Kentucky 42102-7360

b. Facility Location

Holley Performance Products 1801 Russellville Road Bowling Green, Warren County, Kentucky

c. Description of Applicant's Operation

Holley Performance Products manufactures carburetors, fuel injection products, parts and accessories for the automotive industry (SIC Code 3714).

d. Production Capacity of Facility

N/A

e. Description of Existing Pollution Abatement Facilities

Outfall 002 - Storm water runoff is discharged untreated.

Outfall 004 - Storm water runoff is discharged untreated.

Outfall 006 - Storm water runoff is discharged untreated.

Outfall 007 - Storm water runoff is discharged untreated.

KPDES No.: KY0090093
AI No.: 4116

Fact Sheet Page 2

1. SYNOPSIS OF APPLICATION - continued

f. Permitting Action

Modification of a minor KPDES permit for an existing source manufacturer of motor vehicle parts and accessories. The permit is being modified because of a reevaluation of the effluent limitations based upon the most recent discharge data and permitting procedures.

2. **RECEIVING WATERS**

a. Receiving Water Name

Ground water to Lost River

b. Stream Segment Use Classifications

Lost River is classified as Warmwater Aquatic Habitat, Primary/Secondary Contact Recreation and Domestic Water Supply.

c. Stream Segment Antidegradation Categorization

Lost River is designated as a High Quality Water pursuant to 401 KAR 5:030, Section 1(3)(a)1.

d. Stream Low Flow Condition

At the point of discharge, the 7Q10 and the Harmonic Mean for Lost River are 0.3 and 1.6 cfs, respectively.

At the city of Morgantown, KY intake, the nearest downstream public water supply, the 7Q10 and the Harmonic Mean for Green River are 500 and 3450 cfs, respectively.

KPDES No.: KY0090093

AI No.: 4116
Fact Sheet Page 3

3. REPORTED DISCHARGE AND PROPOSED LIMITS

Description of Discharge - Outfall 002 - Storm water runoff

Effluent Characteristics	_		Proposed I Monthly Average	Limits Daily Maximum	Applicable Water Quality Criteria and/or Effluent Guidelines				
Flow (mgd)	0.014	0.615	Report	Report	401 KAR 5:065, Section 2(8)				
Oil & Grease (mg/l)	4	12	Report	Report	401 KAR 5:065, Section 2(8)				
Total Suspended Solids (mg/l)	10	120	Report	Report	401 KAR 5:065, Section 2(8)				
Hardness (as mg/l CaCO ₃)	37	120	Report	Report	401 KAR 5:065, Section 2(8)				
Total Recoverable Aluminum (mg/l)	0.22	1.50	Report	Report	401 KAR 5:065, Section 2(8)				
Total Recoverable Copper (mg/l)	0.009	0.037	Removing fro	om permit	401 KAR 5:080, Section 1(2)(c)2				
Total Recoverable Lead (mg/l)	0.009	0.055	Removing fro	om permit	401 KAR 5:080, Section 1(2)(c)2				
Total Recoverable Zinc (mg/l)	0.33	3.00	N/A	0.12	401 KAR 5:031, Section 4				
pH (standard units)	6.2 (min)	8.9 (max)	6.0 (min)	9.0 (max)	401 KAR 5:031, Section 4				

The data in the Reported Discharge columns for Flow, Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Lead, Total Recoverable Zinc and pH was determined from an analysis of the Discharge Monitoring Reports (DMRs) for the previous and current permit. The data in the Reported Discharge columns for Total Recoverable Copper was determined from an analysis of the Discharge Monitoring Reports (DMRs) from the current permit, for which a lower method detection limit was used.

The abbreviation N/A means Not Applicable.

4. METHODOLOGY USED IN DETERMINING LIMITATIONS

a. Serial Number

Outfall 002 - Storm water runoff from 6 acres, 95% of which is impervious.

b. Effluent Characteristics

Flow Total Recoverable Copper Oil & Grease Total Recoverable Lead Total Suspended Solids Total Recoverable Zinc Hardness pH

Total Recoverable Aluminum

c. Pertinent Factors

A summarization of the water quality standards, assumptions, and calculations can be found in Attachment A - SSTWAM2004 for Holley Performance Products.

d. Monitoring Requirements

Flow shall be monitored instantaneously once per month.

Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Zinc and pH shall be monitored once per month by grab sample.

e. Justification of Limits

The Kentucky Administrative Regulations (KARs) cited below have been duly promulgated pursuant to the requirements of Chapter 224 of the Kentucky Revised Statutes (KRSs).

Flow, Oil & Grease, Total Suspended Solids, Hardness and Total Recoverable Aluminum

The monitoring requirements for these parameters are consistent with the requirements of 401 KAR 5:065, Section 2(8).

Total Recoverable Copper and Total Recoverable Lead

The removal of these parameters from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment A. The reasonable potential analysis performed recommended that a monthly average limit be applied to these parameters. Because the discharge consists of storm water only, the monthly average limitation will not be used. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that these parameters be removed from the permit.

4. METHODOLOGY USED IN DETERMINING LIMITATIONS - continued

e. Justification of Limits - continued

Total Recoverable Zinc

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment A. Based on these results, effluent limitations are required for this parameter. The limits were developed using SSTWAM2004 water quality modeling. Because the discharge consists of storm water only, the monthly average limitation will not be used.

Нq

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4.

KPDES No.: KY0090093

AI No.: 4116
Fact Sheet Page 6

5. REPORTED DISCHARGE AND PROPOSED LIMITS

Description of Discharge - Outfall 004 - Storm water runoff.

Effluent Characteristics	_		Proposed Limits Monthly Daily Average Maximum		Applicable Water Quality Criteria and/or Effluent Guidelines				
Flow (mgd)	0.005	0.211	Report	Report	401 KAR 5:065,	Section 2(8)			
Oil & Grease (mg/l)	4	8	Report	Report	401 KAR 5:065,	Section 2(8)			
Total Suspended Solids (mg/l)	21	240	Report	Report	401 KAR 5:065,	Section 2(8)			
Hardness (as mg/l CaCO ₃)	69	880	Report	Report	401 KAR 5:065,	Section 2(8)			
Total Recoverable Aluminum (mg/l)	0.63	4.10	Report	Report	401 KAR 5:065,	Section 2(8)			
Total Recoverable Copper (mg/l)	0.009	0.030	Removing fro	om permit	401 KAR 5:080,	Section 1(2)(c)2			
Total Recoverable Lead (mg/l)	0.014	0.270	Removing fro	om permit	401 KAR 5:080,	Section 1(2)(c)2			
Total Recoverable Zinc (mg/l)	0.46	5.10	N/A	0.12	401 KAR 5:031,	Section 4			
pH (standard units)	6.4 (min)	9.1 (max)	6.0 (min)	9.0 (max)	401 KAR 5:031,	Section 4			

The data in the Reported Discharge columns for Flow, Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Lead, Total Recoverable Zinc and pH was determined from an analysis of the Discharge Monitoring Reports (DMRs) for the previous and current permit. The data in the Reported Discharge columns for Total Recoverable Copper was determined from an analysis of the Discharge Monitoring Reports (DMRs) from the current permit, for which a lower method detection limit was used.

The abbreviation N/A means Not Applicable.

6. METHODOLOGY USED IN DETERMINING LIMITATIONS

a. Serial Number

Outfall 004 - Storm water runoff from 1.8 acres, all of which is impervious.

b. Effluent Characteristics

Flow Total Recoverable Copper Oil & Grease Total Recoverable Lead Total Suspended Solids Total Recoverable Zinc Hardness pH

Total Recoverable Aluminum

c. Pertinent Factors

A summarization of the water quality standards, assumptions, and calculations can be found in Attachment B - SSTWAM2004 for Holley Performance Products.

d. Monitoring Requirements

Flow shall be monitored instantaneously once per month.

Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Zinc and pH shall be monitored once per month by grab sample.

e. Justification of Limits

The Kentucky Administrative Regulations (KARs) cited below have been duly promulgated pursuant to the requirements of Chapter 224 of the Kentucky Revised Statutes (KRSs).

Flow, Oil & Grease, Total Suspended Solids, Hardness and Total Recoverable Aluminum

The monitoring requirements for these parameters are consistent with the requirements of 401 KAR 5:065, Section 2(8).

Total Recoverable Copper and Total Recoverable Lead

The removal of these parameters from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment B. The reasonable potential analysis performed recommended that a monthly average limit be applied to these parameters. Because the discharge consists of storm water only, the monthly average limitation will not be used. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that these parameters be removed from the permit.

Total Recoverable Copper (mg/l)	0.005	0.011	Removing fro	om permit	401 KAR 5:080,	Section 1(2)(c)2			
Total Recoverable Lead (mg/l)	0.007	0.040	Removing fro	om permit	401 KAR 5:080,	Section 1(2)(c)2			
Total Recoverable Zinc (mg/l)	0.23	1.30	N/A	0.12	401 KAR 5:031,	Section 4			
pH (standard units)	7.1 (min)	9.0 (max)	6.0 (min)	9.0 (max)	401 KAR 5:031,	Section 4			

The data in the Reported Discharge columns for Flow, Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Lead, Total Recoverable Zinc and pH was determined from an analysis of the Discharge Monitoring Reports (DMRs) for the previous and current permit. The data in the Reported Discharge columns for Total Recoverable Copper was determined from an analysis of the Discharge Monitoring Reports (DMRs) from the current permit, for which a lower method detection limit was used.

The abbreviation N/A means Not Applicable.

8. METHODOLOGY USED IN DETERMINING LIMITATIONS

a. Serial Number

Outfall 006 - Storm water runoff from 2.8 acres, 50% of which is impervious.

b. Effluent Characteristics

Flow Total Recoverable Copper Oil & Grease Total Recoverable Lead Total Suspended Solids Total Recoverable Zinc Hardness pH

Total Recoverable Aluminum

c. Pertinent Factors

A summarization of the water quality standards, assumptions, and calculations can be found in Attachment C - SSTWAM2004 for Holley Performance Products.

d. Monitoring Requirements

Flow shall be monitored instantaneously once per month.

Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Zinc and pH shall be monitored once per month by grab sample.

e. Justification of Limits

The Kentucky Administrative Regulations (KARs) cited below have been duly promulgated pursuant to the requirements of Chapter 224 of the Kentucky Revised Statutes (KRSs).

Flow, Oil & Grease, Total Suspended Solids, Hardness and Total Recoverable Aluminum

The monitoring requirements for these parameters are consistent with the requirements of 401 KAR 5:065, Section 2(8).

Total Recoverable Copper

The removal of this parameter from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment C. The reasonable potential analysis performed recommended that no monitoring or limits be applied to this parameter. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that this parameter be removed from the permit.

8. METHODOLOGY USED IN DETERMINING LIMITATIONS - continued

e. Justification of Limits - continued

Total Recoverable Lead

The removal of this parameter from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment C. The reasonable potential analysis performed recommended that a monthly average limit be applied to this parameter. Because the discharge consists of storm water only, the monthly average limitation will not be used. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that this parameter be removed from the permit.

Total Recoverable Zinc

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment C. Based on these results, effluent limitations are required for this parameter. The limits were developed using SSTWAM2004 water quality modeling. Because the discharge consists of storm water only, the monthly average limitation will not be used.

рΗ

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4.

9. REPORTED DISCHARGE AND PROPOSED LIMITS

Description of Discharge - Outfall 007 - Storm water runoff.

Effluent Characteristics	Reported Di Monthly Average	ischarge Daily Maximum	Proposed Limits Monthly Daily Average Maximum		Applicable Water Quality Criteria and/or Effluent Guidelines
Flow (mgd)	0.001	0.061	Report	Report	401 KAR 5:065, Section 2(8)
Oil & Grease (mg/l)	4	4	Report	Report	401 KAR 5:065, Section 2(8)
Total Suspended Solids (mg/l)	18	100	Report	Report	401 KAR 5:065, Section 2(8)
Hardness (as mg/l CaCO ₃)	46	160	Report	Report	401 KAR 5:065, Section 2(8)
Total Recoverable Aluminum (mg/l)	0.41	2.60	Report	Report	401 KAR 5:065, Section 2(8)
Total Recoverable Copper (mg/l)	0.007	0.016	Removing from	om permit	401 KAR 5:080, Section 1(2)(c)2
Total Recoverable Lead (mg/l)	0.018	0.130	Removing fro	om permit	401 KAR 5:080, Section 1(2)(c)2
Total Recoverable Zinc (mg/l)	0.17	0.68	N/A	0.12	401 KAR 5:031, Section 4
pH (standard units)	7.2 (min)	8.9 (max)	6.0 (min)	9.0 (max)	401 KAR 5:031, Section 4

The data in the Reported Discharge columns for Flow, Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Lead, Total Recoverable Zinc and pH was determined from an analysis of the Discharge Monitoring Reports (DMRs) for the previous and current permit. The data in the Reported Discharge columns for Total Recoverable Copper was determined from an analysis of the Discharge Monitoring Reports (DMRs) from the current permit, for which a lower method detection limit was used.

The abbreviation N/A means Not Applicable.

10. METHODOLOGY USED IN DETERMINING LIMITATIONS

a. Serial Number

Outfall 007 - Storm water runoff from 1.3 acres, 80% of which is impervious.

b. Effluent Characteristics

Flow Total Recoverable Copper Oil & Grease Total Recoverable Lead Total Suspended Solids Total Recoverable Zinc Hardness pH

Total Recoverable Aluminum

c. Pertinent Factors

A summarization of the water quality standards, assumptions, and calculations can be found in Attachment D - SSTWAM2004 for Holley Performance Products.

d. Monitoring Requirements

Flow shall be monitored instantaneously once per month.

Oil & Grease, Total Suspended Solids, Hardness, Total Recoverable Aluminum, Total Recoverable Zinc and pH shall be monitored once per month by grab sample.

e. Justification of Limits

The Kentucky Administrative Regulations (KARs) cited below have been duly promulgated pursuant to the requirements of Chapter 224 of the Kentucky Revised Statutes (KRSs).

Flow, Oil & Grease, Total Suspended Solids, Hardness and Total Recoverable Aluminum

The monitoring requirements for these parameters are consistent with the requirements of 401 KAR 5:065, Section 2(8).

Total Recoverable Copper

The removal of this parameter from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment D. The reasonable potential analysis performed recommended monthly average monitoring be applied to this parameter. Because the discharge consists of storm water only, monthly average monitoring will not be required. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that this parameter be removed from the permit.

10. METHODOLOGY USED IN DETERMINING LIMITATIONS - continued

e. Justification of Limits - continued

Total Recoverable Lead

The removal of this parameter from the permit is consistent with 401 KAR 5:080, Section 1(2)(c)2. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment D. The reasonable potential analysis performed recommended that a monthly average limit be applied to this parameter. Because the discharge consists of storm water only, the monthly average limitation will not be used. Therefore, it is the "Best Professional Judgment" (BPJ) of the Division of Water that this parameter be removed from the permit.

Total Recoverable Zinc

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4. The previous permit contained a monitoring requirement but no effluent limitations. Utilizing data from the Discharge Monitoring Reports (DMRs), the Division of Water calculated expected effluent limitations and performed a reasonable potential analysis. The results of this analysis can be found in Attachment D. Based on these results, effluent limitations are required for this parameter. The limits were developed using SSTWAM2004 water quality modeling. Because the discharge consists of storm water only, the monthly average limitation will not be used.

рΗ

The limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 4.

11. ANTIDEGRADATION

The conditions of 401 KAR 5:029, Section 1 have been satisfied by this permit action. Since this permit action involves modification of an existing permit, and does not propose an expanded discharge, a review under 401 KAR 5:030 Section 1 is not applicable.

12. PROPOSED COMPLIANCE SCHEDULE FOR ATTAINING EFFLUENT LIMITATIONS

Permittee shall comply with the effluent limitations by the effective date of the permit.

13. PROPOSED SPECIAL CONDITIONS WHICH WILL HAVE A SIGNIFICANT IMPACT ON THE DISCHARGE

Best Management Practices (BMP) Plan

Pursuant to 401 KAR 5:065, Section 2(10), a BMP requirement shall be included: to control or abate the discharge of pollutants from ancillary areas containing toxic or hazardous substances or those substances which could result in an environmental emergency; where numeric effluent limitations are infeasible; or to carry out the purposes and intent of KRS 224.

14. PROPOSED SPECIAL CONDITIONS WHICH WILL HAVE A SIGNIFICANT IMPACT ON THE DISCHARGE - continued

Outfall Signage

As a member of ORSANCO (Ohio River Valley Sanitation Commission) the Commonwealth of Kentucky through the Division of Water implements a requirement that the permittee post a permanent marker at each discharge point to the Ohio River. It is the Best Professional Judgment of the Division of Water, 401 KAR 5:080, Section 1(2)(c)2, that all permittees post a marker at all discharge locations and/or monitoring points. The ORSANCO requirements for the marker specify it to be at least 2 feet by 2 feet in size and a minimum of 3 feet above ground level with the Permittee Name and KPDES permit and outfall numbers in 2 inch letters. For internal monitoring points the marker shall be of sufficient size to include the outfall number in 2 inch letters and is to be posted as near as possible to the actual sampling location.

15. **PERMIT DURATION**

Expires January 31, 2012. This facility is in the Tradewater/Green Basin Management Unit as per the Kentucky Watershed Management Framework.

16. **PERMIT INFORMATION**

The application, draft permit fact sheet, public notice, comments received and additional information is available by writing the Division of Water at 200 Fair Oaks Lane, Frankfort, Kentucky 40601.

17. REFERENCES AND CITED DOCUMENTS

All material and documents referenced or cited in this fact sheet are a part of the permit information as described above and are readily available at the Division of Water Central Office. Information regarding these materials may be obtained from the person listed below.

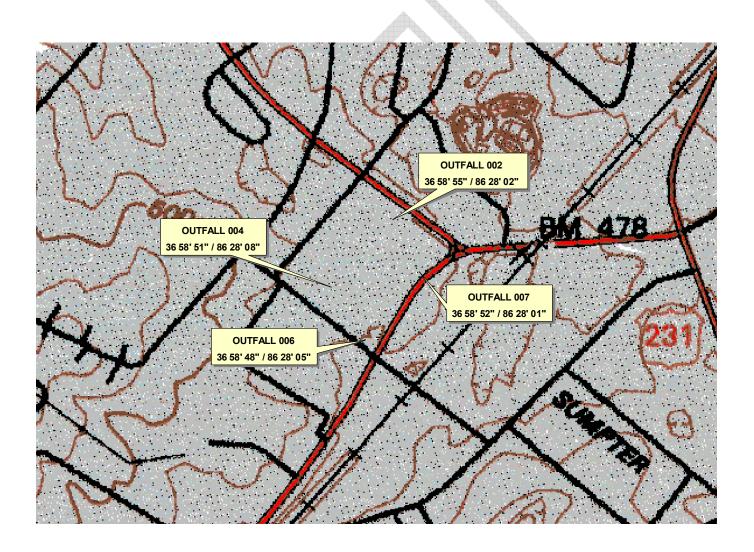

18. CONTACT

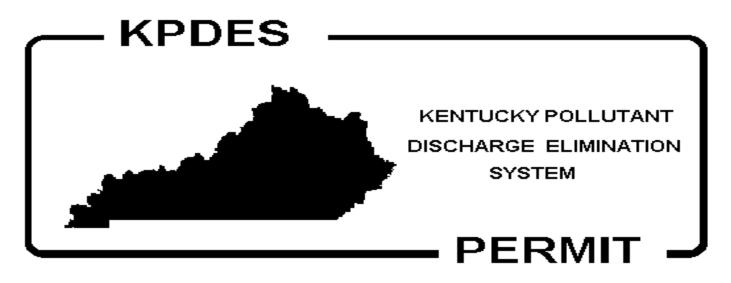

For further information, contact the individual identified on the Public Notice or the Permit Writer - Ronnie Thompson at (502) 564-8158, extension 4896 or e-mail Ronnie.Thompson@ky.gov.

19. PUBLIC NOTICE INFORMATION

Please refer to the attached Public Notice for details regarding the procedures for a final permit decision, deadline for comments, and other information required by 401 KAR 5:075, Section 4(2)(e).

Holley Performance Products

PERMIT NO.: KY0090093 **AI No.:** 4116

AUTHORIZATION TO DISCHARGE UNDER THE KENTUCKY POLLUTANT DISCHARGE ELIMINATION SYSTEM

Pursuant to Authority in KRS 224,

Holley Performance Products PO Box 10360 Bowling Green, Kentucky 42102-7360

is authorized to discharge from a facility located at

Holley Performance Products 1801 Russellville Road Bowling Green, Warren County, Kentucky

to receiving waters named

Ground water to Lost River

in accordance with effluent limitations, monitoring requirements, and other conditions set forth in PARTS I, II, III, and IV hereof. The permit consists of this cover sheet, PART I $\underline{2}$ pages, PART II $\underline{6}$ pages, PART III $\underline{1}$ page, and PART IV $\underline{3}$ pages.

This permit became effective on February 1, 2007.

This modified permit shall become effective on

This permit and the authorization to discharge shall expire at midnight, January 31, 2012.

Date Signed Sandra L. Gruzesky, Director

Sandra L. Gruzesky, Director Division of Water

Permit No.: KY0090093

AI No.: 4116

A. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

During the period beginning on the effective date of this permit and lasting through the term of this permit, the permittee is authorized to discharge from Outfalls serial numbers: 002, 004, 006 and 007 - Storm water runoff.

Such discharges shall be limited and monitored by the permittee as specified below:

EFFLUENT CHARACTERISTICS		DISCHARGE	LIMITATIONS		MONITORING REQUIREMENTS		
	(lbs/	day)	Other Units	(Specify)			
	Monthly	Daily	Monthly	Daily	Measurement	Sample	
	Avg.	Max.	Avg.	Max.	Frequency	Type	
Flow (mgd)	Report	Report	N/A	N/A	1/Month	Instantaneous	
Oil & Grease (mg/l)	N/A	N/A	Report	Report	1/Month	Grab	
Total Suspended Solids (mg/l)	N/A	N/A	Report	Report	1/Month	Grab	
Hardness (as mg/l CaCO ₃)	N/A	N/A	Report	Report	1/Month	Grab	
Total Recoverable Aluminum (mg/l)	N/A	N/A	Report	Report	1/Month	Grab	
Total Recoverable Zinc	N/A	N/A	N/A	0.12 mg/l	1/Month	Grab	

The pH of the effluent shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitored 1/Month by grab sample.

There shall be no discharge of floating solids or visible foam or sheen in other than trace amounts.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location: nearest accessible point prior to discharge or to mixing with the receiving waters or waste streams from other outfalls.

The abbreviation N/A means Not Applicable.

Permit No.: KY0090093 AI No.: 4116

B. Schedule of Compliance

The permittee shall achieve compliance with all requirements on the effective date of this permit.

Permit No.: KY0090093

AI No.: 4116

STANDARD CONDITIONS FOR KPDES PERMIT

The permittee is also advised that all KPDES permit conditions in KPDES Regulation 401 KAR 5:065, Section 1 will apply to all discharges authorized by this permit.

This permit has been issued under the provisions of KRS Chapter 224 and regulations promulgated pursuant thereto. Issuance of this permit does not relieve the permittee from the responsibility of obtaining any other permits or licenses required by this Cabinet and other state, federal, and local agencies.

It is the responsibility of the permittee to demonstrate compliance with permit parameter limitations by utilization of sufficiently sensitive analytical methods.

(1) Duty to comply.

(a) General requirement.

The permittee shall comply with all conditions of this permit. Any permit noncompliance shall constitute a violation of KRS Chapter 224, among which shall be the following remedies: enforcement action, permit revocation, revocation and reissuance, or modification; or denial of a permit renewal application.

(b) Specific duties.

- 1. The permittee shall comply with effluent standards or prohibitions established under 40 CFR Part 129 as of July 1, 2001, as adopted without change, within the time provided in the federal regulations that establish these standards or prohibitions, even if the permit has not yet been modified to incorporate the requirement.
- 2. Any person who violates a permit condition as set forth in the KPDES administrative regulations shall be subject to penalties under KRS 224.99-010(1) and (4).

(2) Duty to reapply.

If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall apply for and obtain a new permit as required in 401 KAR 5:060, Section 1.

(3) Need to halt or reduce activity not a defense.

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(4) Duty to mitigate.

The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit that has a reasonable likelihood of adversely affecting human health or the environment.

(5) Proper operation and maintenance.

The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control and related appurtenances which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also shall include adequate laboratory controls, and appropriate quality assurance procedures. This provision shall require the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only if the operation is necessary to achieve compliance with the conditions of the permit.

Permit No.: KY0090093

AI No.: 4116

(6) Permit actions.

The permit may be modified, revoked and reissued, or revoked for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or a notification of planned changes or anticipated noncompliance, shall not stay any permit condition.

(7) Property rights.

This permit shall not convey any property rights of any kind, or any exclusive privilege.

(8) Duty to provide information.

The permittee shall furnish to the cabinet, within a reasonable time, any information which the cabinet may request to determine whether cause exists for modifying, revoking and reissuing, or revoking this permit, or to determine compliance with this permit. The permittee shall also furnish to the cabinet, upon request, copies of records required to be kept by this permit.

(9) Inspection and entry.

The permittee shall allow the cabinet, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

- (a) Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records pertinent to the KPDES program are or may be kept;
- (b) Have access to and copy, at reasonable times, any records that are required to be kept under the conditions of this permit;
- (c) Inspect at reasonable times any facilities, equipment, including monitoring and control equipment, practices, or operations regulated or required under this permit; and
- (d) Sample or monitor at reasonable times, for the purposes of assuring KPDES program compliance or as otherwise authorized by KRS Chapter 224, any substances or parameters at any location.

(10) Monitoring and records.

- (a) Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
- (b) The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three (3) years from the date of the sample, measurement, report, or application. This period may be extended by request of the cabinet at any time.
- (c) Records of monitoring information shall include:
- 1. The date, exact place, and time of sampling or measurements;
- 2. The individuals who performed the sampling or measurements;
- 3. The dates analyses were performed;
- 4. The individuals who performed the analyses;
- 5. The analytical techniques or methods used; and
- 6. The results of the analyses.
- (d) Monitoring shall be conducted according to test procedures approved under 40 CFR Part 136, unless other test procedures have been specified in the permit.
- (e) Any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under the permit shall, upon conviction, be subject to penalties under KRS 224.99-010(4).

Permit No.: KY0090093

AI No.: 4116

(11) Signatory requirement.

All applications, reports, or information submitted to the cabinet shall be signed and certified as indicated in 401 KAR 5:060, Section 9. Any person who knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including monitoring reports or reports of compliance or noncompliance shall, upon conviction, be subject to penalties under KRS 224.99-010(4).

(12) Reporting requirements.

(a) Planned changes.

The permittee shall give notice to the cabinet as soon as possible of any planned physical alteration or additions to the permitted facility. Notice shall be required only if:

- 1. The alteration or addition to a permitted facility may meet one (1) of the criteria for determining whether a facility is a new source in 401 KAR 5:080, Section 5; or
- 2. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification only applies to pollutants which are subject either to effluent limitations in the permit, or to notification requirements under 401 KAR 5:080, Section 5.

(b) Anticipated noncompliance.

The permittee shall give advance notice to the cabinet of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

(c) Transfers.

The permit shall not be transferable to any person except after notice to the cabinet. The cabinet may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate other requirements as may be necessary under KRS Chapter 224.

(d) Monitoring reports.

Monitoring results shall be reported at the intervals specified in the permit. Monitoring results shall be reported as follows:

- 1. Monitoring results shall be reported on a Discharge Monitoring Report (DMR).
- 2. If the permittee monitors any pollutant more frequently than required by the permit, using test procedures approved under 40 CFR Part 136 or as specified in the permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR.
- 3. Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified by the cabinet in the permit.

(e) Compliance schedules.

Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than fourteen (14) days following each schedule date.

Permit No.: KY0090093

AI No.: 4116

(f) Twenty-four (24) hour reporting.

The permittee shall follow the provisions of 401 KAR 5:015 and shall orally report any noncompliance which may endanger health or the environment, within twenty-four (24) hours from the time the permittee becomes aware of the circumstances. This report shall be in addition to and not in lieu of any other reporting requirement applicable to the noncompliance. A written submission shall also be provided within five (5) days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. The cabinet may waive the written report on a case-by-case basis if the oral report has been received within twenty-four (24) hours. The following shall be included as events which shall be reported within twenty-four (24) hours:

- 1. Any unanticipated bypass which exceeds any effluent limitation in the permit, as indicated in subsection (13) of this section.
- 2. Any upset which exceeds any effluent limitation in the permit.
- 3. Violation of a maximum daily discharge limitation for any of the pollutants listed by the cabinet in the permit to be reported within twenty-four (24) hours, as indicated in Section 2(7) of this administrative regulation.

(g) Other noncompliance.

The permittee shall report all instances of noncompliance not reported under paragraphs (d), (e), and (f) of this subsection, when monitoring reports are submitted. The reports shall contain the information listed in paragraph (f) of this subsection.

(h) Other information.

Where the permittee becomes aware that it failed to submit any relevant fact in a permit application, or submitted incorrect information in a permit application or in any report to the cabinet, it shall promptly submit these facts or information.

(13) Occurrence of a bypass.

(a) Bypass not exceeding limitations.

The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. This type of bypass shall not be subject to the provisions of paragraphs (b) and (c) of this subsection.

(b) Notice.

1. Anticipated bypass.

If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten (10) days before the date of the bypass. Compliance with this requirement constitutes compliance with 401 KAR 5:015, Section 1.

2. Unanticipated bypass.

The permittee shall submit notice of an unanticipated bypass as required in subsection (12)(f) of this section, twenty-four (24) hour notice. Compliance with this requirement constitutes compliance with 401 KAR 5:015, Section 4.

Permit No.: KY0090093

AI No.: 4116

(c) Prohibition of a bypass.

1. Bypassing shall be prohibited, and the cabinet may take enforcement action against a permittee for bypass, unless:

- a. The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;
- b. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition shall not be satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and
- c. The permittee submitted notices as required under paragraph (b) of this subsection.
- 2. The cabinet may approve an anticipated bypass, after considering its adverse effects, if the cabinet determines that it will meet the three (3) conditions listed in subparagraph 1a, b, and c of this paragraph.

(14) Occurrence of an upset.

(a) Effect of an upset.

An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based permit effluent limitations if the requirements of paragraph (b) of this subsection are met.

(b) Conditions necessary for a demonstration of an upset.

A permittee who wishes to establish the affirmative defense of upset shall demonstrate through properly signed, contemporaneous operating logs, or other relevant evidence that:

- 1. An upset occurred and that the permittee can identify the causes of the upset;
- 2. The permitted facility was at the time being properly operated;
- 3. The permittee submitted notice of the upset as required in subsection (12)(f) of this section; and
- 4. The permittee complied with any remedial measures required under subsection (4) of this section.

(c) Burden of proof.

In any enforcement proceeding, the permittee seeking to establish the occurrence of an upset shall have the burden of proof.

Permit No.: KY0090094

AI No.: 4116

(15) Additional conditions applicable to specified categories of KPDES permits. The following conditions, in addition to others set forth in this administrative regulation, shall apply to all KPDES permits within the categories specified below:

(a) Existing manufacturing, commercial, mining, and silvicultural dischargers.

- In addition to the reporting requirements under subsections (12), (13), and (14) of this section, any existing manufacturing, commercial, mining, and silvicultural discharger shall notify the cabinet as soon as it knows or has reason to know:
- 1. That any activity has occurred or will occur which would result in the discharge on a routine or frequent basis, of any toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels:"
- a. 100 micrograms per liter (100 μ g/l);
- b. 200 micrograms per liter (200 $\mu g/l$) for acrolein and acrylonitrile; 500 micrograms per liter (500 $\mu g/l$) for 2,4-dinitrophenol and for 2-methyl-4,6-dinitrophenol; and one (1) milligram per liter (1 mg/l) for antimony;
- c. Five (5) times the maximum concentration value reported for that pollutant in the permit application in accordance with 401 KAR 5:060, Section 2(7);
- d. The level established by the cabinet in accordance with Section 2(6) of this administrative regulation.
- 2. That any activity has occurred or will occur which would result in any discharge, on a nonroutine or infrequent basis, of a toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels:"
- a. 500 micrograms per liter (500 μ g/l);
- b. One (1) milligram per liter (1 mg/l) for antimony;
- c. Ten (10) times the maximum concentration value reported for that pollutant in the permit application in accordance with 401 KAR 5:060, Section 2(7); or
- d. The level established by the cabinet in accordance with Section 2(6) of this administrative regulation.

(b) POTWs.

- 1. POTWs shall provide adequate notice to the cabinet of the following:
- a. Any new introduction of pollutants into that POTW from an indirect discharger which would be subject to the KPDES administrative regulations if it were directly discharging those pollutants; or
- b. Any substantial change in the volume or character of pollutants being introduced into that POTW by a source introducing pollutants into the POTW at the time of issuance of the permit.
- 2. For purposes of this paragraph, adequate notice shall include information on the quality and quantity of effluent introduced into the POTWs and any anticipated impact of the change on the quantity or quality of effluent to be discharged from the POTW.

Permit No.: KY0090093

AI No.: 4116

PART III

OTHER REQUIREMENTS

A. Reporting of Monitoring Results

Monitoring results obtained during each monitoring period must be reported on a preprinted Discharge Monitoring Report (DMR) Form that will be mailed to you. The completed DMR for each monitoring period must be sent to the Division of Water at the address listed below (with a copy to the appropriate Regional Office) postmarked no later than the 28th day of the month following the monitoring period for which monitoring results were obtained.

Division of Water Energy and Environment Cabinet
Bowling Green Regional Office Dept. for Environmental Protection
1508 Westen Avenue Division of Water/Surface Water Permits Branch
Bowling Green, Kentucky 42104 200 Fair Oaks Lane
ATTN: Supervisor Frankfort, Kentucky 40601

B. Reopener Clause

This permit shall be modified, or alternatively revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under 401 KAR 5:050 through 5:086, if the effluent standard or limitation so issued or approved:

- 1. Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or
- 2. Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of KRS Chapter 224 when applicable.

C. Outfall Signage

The permittee shall post a permanent marker at all discharge locations and/or monitoring points. The marker shall be at least 2 feet by 2 feet in size and a minimum of 3 feet above ground level with the Permittee Name and KPDES permit and outfall numbers in 2 inch letters. For internal monitoring points the marker shall be of sufficient size to include the outfall number in 2 inch letters and shall be posted as near as possible to the actual sampling location.

PART IV Page IV-1

Permit No.: KY0090093

AI No.: 4116

PART IV

BEST MANAGEMENT PRACTICES

SECTION A. GENERAL CONDITIONS

1. Applicability

These conditions apply to all permittees who use, manufacture, store, handle, or discharge any pollutant listed as: (1) toxic under Section 307(a)(1) of the Clean Water Act; (2) oil, as defined in Section 311(a)(1) of the Act; (3) any pollutant listed as hazardous under Section 311 of the Act; or (4) is defined as a pollutant pursuant to KRS 224.01-010(35) and who have ancillary manufacturing operations which could result in (1) the release of a hazardous substance, pollutant, or contaminant, or (2) an environmental emergency, as defined in KRS 224.01-400, as amended, or any regulation promulgated pursuant thereto (hereinafter, the "BMP pollutants"). These operations include material storage areas; plant site runoff; in-plant transfer, process and material handling areas; loading and unloading operations, and sludge and waste disposal areas.

2. BMP Plan

The permittee shall develop and implement a Best Management Practices (BMP) plan consistent with 401 KAR 5:065, Section 2(10) pursuant to KRS 224.70-110, which prevents or minimizes the potential for the release of "BMP pollutants" from ancillary activities through plant site runoff; spillage or leaks, sludge or waste disposal; or drainage from raw material storage. A Best Management Practices (BMP) plan will be prepared by the permittee unless the permittee can demonstrate through the submission of a BMP outline that the elements and intent of the BMP have been fulfilled through the use of existing plans such as the Spill Prevention Control and Countermeasure (SPCC) plans, contingency plans, and other applicable documents.

3. Implementation

If this is the first time for the BMP requirement, then the plan shall be developed and submitted to the Division of Water within 90 days of the effective date of the permit. Implementation shall be within 180 days of that submission. For permit renewals, the plan in effect at the time of permit reissuance shall remain in effect. Modifications to the plan as a result of ineffectiveness or plan changes to the facility shall be submitted to the Division of Water and implemented as soon as possible.

4. General Requirements

The BMP plan shall:

- a. Be documented in narrative form, and shall include any necessary plot plans, drawings, or maps.
- b. Establish specific objectives for the control of toxic and hazardous pollutants.
 - (1) Each facility component or system shall be examined for its potential for causing a release of "BMP pollutants" due to equipment failure, improper operation, natural phenomena such as rain or snowfall, etc.

PART IV Page IV-2

Permit No.: KY0090093 AI No.: 4116

- (2) Where experience indicates a reasonable potential for equipment failure (e.g., a tank overflow or leakage), natural condition (e.g., precipitation), or other circumstances which could result in a release of "BMP pollutants," the plan should include a prediction of the direction, rate of flow, and total quantity of the pollutants which could be released from the facility as result of each condition or circumstance.
- c. Establish specific Best Management Practices to meet the objectives identified under paragraph b of this section, addressing each component or system capable of causing a release of "BMP pollutants."
- d. Include any special conditions established in part b of this section.
- e. Be reviewed by plant engineering staff and the plant manager.

5. Specific Requirements

The plan shall be consistent with the general guidance contained in the publication entitled "NPDES Best Management Practices Guidance Document," and shall include the following baseline BMPs as a minimum.

- a. BMP Committee
- b. Reporting of BMP Incidents
- c. Risk Identification and Assessment
- d. Employee Training
- e. Inspections and Records
- f. Preventive Maintenance
- g. Good Housekeeping
- h. Materials Compatibility
- i. Security
- j. Materials Inventory

6. SPCC Plans

The BMP plan may reflect requirements for Spill Prevention Control and Countermeasure (SPCC) plans under Section 311 of the Act and 40 CFR Part 151, and may incorporate any part of such plans into the BMP plan by reference.

7. Hazardous Waste Management

The permittee shall assure the proper management of solid and hazardous waste in accordance with the regulations promulgated under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1978 (RCRA) (40 U.S.C. 6901 et seq.) Management practices required under RCRA regulations shall be referenced in the BMP plan.

PART IV Page IV-3

Permit No.: KY0090093 AI No.: 4116

8. Documentation

The permittee shall maintain a description of the BMP plan at the facility and shall make the plan available upon request to NREPC personnel. Initial copies and modifications thereof shall be sent to the following addresses when required by Section 3:

Division of Water Energy and Environment Cabinet
Bowling Green Regional Office Dept. for Environmental Protection
1508 Westen Avenue Division of Water/Surface Water Permits Branch
Bowling Green, Kentucky 42104 200 Fair Oaks Lane
ATTN: Supervisor Frankfort, Kentucky 40601

9. BMP Plan Modification

The permittee shall amend the BMP plan whenever there is a change in the facility or change in the operation of the facility which materially increases the potential for the ancillary activities to result in the release of "BMP pollutants."

10. Modification for Ineffectiveness

If the BMP plan proves to be ineffective in achieving the general objective of preventing the release of "BMP pollutants," then the specific objectives and requirements under paragraphs b and c of Section 4, the permit, and/or the BMP plan shall be subject to modification to incorporate revised BMP requirements. If at any time following the issuance of this permit the BMP plan is found to be inadequate pursuant to a state or federal site inspection or plan review, the plan shall be modified to incorporate such changes necessary to resolve the concerns.

SECTION B. SPECIFIC CONDITIONS

Periodically Discharged Wastewaters Not Specifically Covered By Effluent Conditions

The permittee shall include in this BMP plan procedures and controls necessary for the handling of periodically discharged wastewaters such as intake screen backwash, meter calibration, fire protection, hydrostatic testing water, water associated with demolition projects, etc.

pka=(0.0902+(2730/(273.1+T))) T = Temperature

[0.411/(1+10^(7.204-pH))]+[58.4/(1+10^(pH-7.204))]

Bioaccumulative or Persistent

For new facilities after September 8, 2004 mixing zones shall not be granted for bioaccumulative or persistent pollutants of concern.

Mixing zones for bioaccumulative or persistent pollutants of concerned assigned prior to September 8, 2004 shall expire no later than September 8, 2014, unless the permittee agrees to expiration of the mixing zone prior to that date.

Therefore, the application of the more stringent criteria of Human Health Fish & Water Consumption, Human Health Fish Only Consumption, and Aquatic Life Chronic shall apply as end-of-pipe effluent limitations.

Antidegradation

If a new facility or an existing facility that will have a pollutant load increase, the effluent limits are halved unless the receiving stream is impaired or the permittee has demonstrated a negative socioeconomic or cost benefit analysis.

AI No.: 4116

Fact Sheet Attachment A

Page A - 4

STEADY STATE TOXICS WASTELOAD ALLOCATION MODEL (SSTWAM2004) - REASONABLE POTENTIAL ANALYSIS - OUTFALL 002

Reasonable Potential Analysis

In establishing water quality based effluent conditions the Division of Water must determine if the pollutant concentrations in the discharge will cause, have the reasonable potential to cause, or contribute to an excursion of any water standard. The process by which the Division of Water makes this determination is known as a Reasonable Potential Analysis.

A Reasonable Potential Analysis is performed by first calculating the expected effluent limitations for those pollutants with water quality criteria. The calculated limits are then compared to the concentrations reported on the KPDES permit application and/or a summarization of the values reported on the Discharge Monitoring Report (DMRs) submitted during the term of the permit. This comparison is made by dividing the reported value by the calculated effluent limitation and converting to a percentage. The following criteria are used in determining how the pollutant will be addressed in the permit.

New Permits or New Pollutants on Permit Renewals

If the reported concentration is less than 70% of the calculated effluent limit then no monitoring or limitations will be required.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is less than 12 then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is equal or greater than 12 then an effluent limitation will be required.

Permit Renewals - Existing Pollutants

If the reported concentration is less than 70% of the calculated effluent limit then and the source of the reported concentration was the DMRs for that facility and there were more than 12 DMRs utilized to determine the reported concentrations then the pollutant will be removed from the permit.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% then an effluent limitation will be required.

In all cases, the Division of Water still may exercise its Best Professional Judgment in the implementation of the results.

STEADY STATE TOXICS WASTELOAD ALLOCATION MODEL (SSTWAM2004) - REASONABLE POTENTIAL ANALYSIS - OUTFALL 004

Calculation Methodology

Definitions

Acute to Chronic Ratio	ACR	Total Effluent Flow	Q_T
Aquatic Life Acute Criteria	C_A	Receiving Water 7Q10	Q _{RW7Q10}
Aquatic Life Chronic Criteria	C_C	Receiving Water Harmonic Mean	Q _{RWHM}
Human Health Criteria - Fish Only	C_{HHFO}	Intake Water 7Q10	Q_{IW7Q10}
Human Health Criteria - Fish & Water	C_{HHFW}	Intake Water Harmonic Mean	Q _{IWHM}
End of Pipe Effluent Limit	C_T	Zone of Initial Dilution	ZID
Instream Background Concentration	C_{U}	Mixing Zone	MZ
Toxicity Units - Acute	TU_a	Toxicity Units - Chronic	TU_c
Effluent Hardness	H_T	Receiving Water Hardness	H_RW

Aquatic Life - Chemical Specific

Acute Chronic Mixing Zone / Complete Mix

NO ZID given $C_T = C_A$ $C_T = \{C_C[Q_T + (MZ)(Q_{RW7Q10})] - [C_U(MZ)(Q_{RW7Q10})]\}/Q_T$

ZID given $C_T = (C_A - C_U) \times (ZID)$

Human Health - Chemical Specific

Fish Only: Mixing Zone / Complete Mix

Carcinogen / Non-Carcinogen $C_T = \{C_{HHFO}[Q_T + (MZ)(Q_{RWHM})] - C_U(MZ)(Q_{RWHM})\}/Q_T$

Fish & Water Only: Mixing Zone / Applicable at point of withdrawal

 $\begin{array}{c} \text{Carcinogen} & \text{C}_{\text{T}} = \{\text{C}_{\text{HHFW}}[\text{Q}_{\text{T}} + (\text{Q}_{\text{IWHM}})] - \text{C}_{\text{U}}(\text{Q}_{\text{IWHM}})\}/\text{Q}_{\text{T}} \\ \text{Non-Carcinogen} & \text{C}_{\text{T}} = \{\text{C}_{\text{HHFW}}[\text{Q}_{\text{T}} + (\text{Q}_{\text{IW7Q10}})] - \text{C}_{\text{U}}(\text{Q}_{\text{IW7Q10}})\}/\text{Q}_{\text{T}} \\ \end{array}$

Aquatic Life - Whole Effluent Toxicity

ZID given $C_T = (C_A - C_U) \times (ZID)$ Conversion of TU_c to TU_a : $TU_c \times ACR = TU_a$

Total Ammonia Criteria

Chronic - applies state wide - unionzed criteria of 0.05 mg/l

°C.

Acute - applies to the Ohio River (ORSANCO Criteria)

 $[0.05*(1+10^{(pka-pH))}]/1.2 pka=(0.0902+(2730/(273.1+T))$

T = Temperature

 $[0.411/(1+10^{(7.204-pH)})]+[58.4/(1+10^{(pH-7.204)})]$

Bioaccumulative or Persistent

For new facilities after September 8, 2004 mixing zones shall not be granted for bioaccumulative or persistent pollutants of concern.

Mixing zones for bioaccumulative or persistent pollutants of concerned assigned prior to September 8, 2004 shall expire no later than September 8, 2014, unless the permittee agrees to expiration of the mixing zone prior to that date.

Therefore, the application of the more stringent criteria of Human Health Fish & Water Consumption, Human Health Fish Only Consumption, and Aquatic Life Chronic shall apply as end-of-pipe effluent limitations.

Antidegradation

If a new facility or an existing facility that will have a pollutant load increase, the effluent limits are halved unless the receiving stream is impaired or the permittee has demonstrated a negative socioeconomic or cost benefit analysis.

AI No.: 4116

Page B - 4

STEADY STATE TOXICS WASTELOAD ALLOCATION MODEL (SSTWAM2004) - REASONABLE POTENTIAL ANALYSIS - OUTFALL 004

Reasonable Potential Analysis

In establishing water quality based effluent conditions the Division of Water must determine if the pollutant concentrations in the discharge will cause, have the reasonable potential to cause, or contribute to an excursion of any water standard. The process by which the Division of Water makes this determination is known as a Reasonable Potential Analysis.

A Reasonable Potential Analysis is performed by first calculating the expected effluent limitations for those pollutants with water quality criteria. The calculated limits are then compared to the concentrations reported on the KPDES permit application and/or a summarization of the values reported on the Discharge Monitoring Report (DMRs) submitted during the term of the permit. This comparison is made by dividing the reported value by the calculated effluent limitation and converting to a percentage. The following criteria are used in determining how the pollutant will be addressed in the permit.

New Permits or New Pollutants on Permit Renewals

If the reported concentration is less than 70% of the calculated effluent limit then no monitoring or limitations will be required.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is less than 12 then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is equal or greater than 12 then an effluent limitation will be required.

Permit Renewals - Existing Pollutants

If the reported concentration is less than 70% of the calculated effluent limit then and the source of the reported concentration was the DMRs for that facility and there were more than 12 DMRs utilized to determine the reported concentrations then the pollutant will be removed from the permit.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% then an effluent limitation will be required.

In all cases, the Division of Water still may exercise its Best Professional Judgment in the implementation of the results.

pka=(0.0902+(2730/(273.1+T))

Total Ammonia Criteria

Chronic - applies state wide - unionzed criteria of 0.05 mg/l

Acute - applies to the Ohio River (ORSANCO Criteria)

[0.411/(1+10^(7.204-pH))]+[58.4/(1+10^(pH-7.204))]

[0.05*(1+10^(pka-pH))]/1.2

T = Temperature

Bioaccumulative or Persistent

For new facilities after September 8, 2004 mixing zones shall not be granted for bioaccumulative or persistent pollutants of concern.

Mixing zones for bioaccumulative or persistent pollutants of concerned assigned prior to September 8, 2004 shall expire no later than September 8, 2014, unless the permittee agrees to expiration of the mixing zone prior to that date.

Therefore, the application of the more stringent criteria of Human Health Fish & Water Consumption, Human Health Fish Only Consumption, and Aquatic Life Chronic shall apply as end-of-pipe effluent limitations.

Antidegradation

If a new facility or an existing facility that will have a pollutant load increase, the effluent limits are halved unless the receiving stream is impaired or the permittee has demonstrated a negative socioeconomic or cost benefit analysis.

STEADY STATE TOXICS WASTELOAD ALLOCATION MODEL (SSTWAM2004) - REASONABLE POTENTIAL ANALYSIS - OUTFALL 006

Reasonable Potential Analysis

In establishing water quality based effluent conditions the Division of Water must determine if the pollutant concentrations in the discharge will cause, have the reasonable potential to cause, or contribute to an excursion of any water standard. The process by which the Division of Water makes this determination is known as a Reasonable Potential Analysis.

A Reasonable Potential Analysis is performed by first calculating the expected effluent limitations for those pollutants with water quality criteria. The calculated limits are then compared to the concentrations reported on the KPDES permit application and/or a summarization of the values reported on the Discharge Monitoring Report (DMRs) submitted during the term of the permit. This comparison is made by dividing the reported value by the calculated effluent limitation and converting to a percentage. The following criteria are used in determining how the pollutant will be addressed in the permit.

New Permits or New Pollutants on Permit Renewals

If the reported concentration is less than 70% of the calculated effluent limit then no monitoring or limitations will be required.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is less than 12 then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is equal or greater than 12 then an effluent limitation will be required.

Permit Renewals - Existing Pollutants

If the reported concentration is less than 70% of the calculated effluent limit then and the source of the reported concentration was the DMRs for that facility and there were more than 12 DMRs utilized to determine the reported concentrations then the pollutant will be removed from the permit.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% then an effluent limitation will be required.

In all cases, the Division of Water still may exercise its Best Professional Judgment in the implementation of the results.

Total Ammonia Criteria

Chronic - applies state wide - unionzed criteria of 0.05 mg/l

Acute - applies to the Ohio River (ORSANCO Criteria)

 $[0.05*(1+10^{(pka-pH))}]/1.2$ pka=(

pka=(0.0902+(2730/(273.1+T))

T = Temperature

 $[0.411/(1+10^{(7.204-pH)})]+[58.4/(1+10^{(pH-7.204)})]$

Bioaccumulative or Persistent

For new facilities after September 8, 2004 mixing zones shall not be granted for bioaccumulative or persistent pollutants of concern.

Mixing zones for bioaccumulative or persistent pollutants of concerned assigned prior to September 8, 2004 shall expire no later than September 8, 2014, unless the permittee agrees to expiration of the mixing zone prior to that date.

Therefore, the application of the more stringent criteria of Human Health Fish & Water Consumption, Human Health Fish Only Consumption, and Aquatic Life Chronic shall apply as end-of-pipe effluent limitations.

Antidegradation

If a new facility or an existing facility that will have a pollutant load increase, the effluent limits are halved unless the receiving stream is impaired or the permittee has demonstrated a negative socioeconomic or cost benefit analysis.

STEADY STATE TOXICS WASTELOAD ALLOCATION MODEL (SSTWAM2004) - REASONABLE POTENTIAL ANALYSIS - OUTFALL 007

Reasonable Potential Analysis

In establishing water quality based effluent conditions the Division of Water must determine if the pollutant concentrations in the discharge will cause, have the reasonable potential to cause, or contribute to an excursion of any water standard. The process by which the Division of Water makes this determination is known as a Reasonable Potential Analysis.

A Reasonable Potential Analysis is performed by first calculating the expected effluent limitations for those pollutants with water quality criteria. The calculated limits are then compared to the concentrations reported on the KPDES permit application and/or a summarization of the values reported on the Discharge Monitoring Report (DMRs) submitted during the term of the permit. This comparison is made by dividing the reported value by the calculated effluent limitation and converting to a percentage. The following criteria are used in determining how the pollutant will be addressed in the permit.

New Permits or New Pollutants on Permit Renewals

If the reported concentration is less than 70% of the calculated effluent limit then no monitoring or limitations will be required.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is less than 12 then monitoring will be required.

If the reported concentration is equal to or greater than 90% and the number of analysis reported on the KPDES permit application is equal or greater than 12 then an effluent limitation will be required.

Permit Renewals - Existing Pollutants

If the reported concentration is less than 70% of the calculated effluent limit then and the source of the reported concentration was the DMRs for that facility and there were more than 12 DMRs utilized to determine the reported concentrations then the pollutant will be removed from the permit.

If the reported concentration is equal to or greater than 70% but less than 90% of the calculated effluent limit then monitoring will be required.

If the reported concentration is equal to or greater than 90% then an effluent limitation will be required.

In all cases, the Division of Water still may exercise its Best Professional Judgment in the implementation of the results.

Uranium		0.000000	0.000000	NA	0.030000	0.00%	0.00%	No Data	0	None	None	NA	Acute
Total Ammonia		0.000000	0.000000	3.360911	19.890204	0.00%	0.00%	No Data	0	None	None	Chronic	Acute
Hardness	Chronic	Acute											
Metal limitations are developed	100.00	100.00											

Metal limitations are developed using the mixed hardness of the effluent and receiving waters
